## OUI Inc.'s Smart Eye Camera touches down in Uganda!

In September 2022, Ayano Toyosawa from OUI Inc. visited 2 hospitals in the Republic of Uganda to pilot our Smart Eye Camera. The population of Uganda is 45 million, but there are only 50 ophthalmologists.

First, she visited Makerere University College of Health Sciences in Kampala, the capital of Uganda. We had a meeting with Dr. Atukunda Immaculate, who is teaching ophthalmologists at Makerere University and working at the Mulago Hospital clinic. After explaining our Smart Eye Camera to her, we provided one device to her because she was very interested in our device and because we thought it would have a great impact on the development of ophthalmology in Uganda in the future. When she used our Smart Eye Camera, she commented that it was lightweight and that she liked the fact that the video data taken would remain in the cloud. They plan to use it when the residents go on monthly outreach. They commented that it is good because it allows smooth communication and accurate diagnosis with the residents even if the professor is in the capital.

Next, Ayano visited the Mbarara University & Referral Hospital Eye Clinic. This clinic is a public hospital with inpatient and outpatient services, located 5 hours by bus from the capital Kampala. There are 4 doctors and 5 residents. From morning till night, many patients come to the hospital constantly and wait for a long time to be seen. Our Smart Eye Camera was used to examine a patient who came to the outpatient clinic that day. Our Smart Eye Camera will be used in the future at Mbarara Hospital, which has a large caseload, to shorten the waiting time for patients.

We will continue to collaborate with various universities and hospitals to overcome world blindness while providing evidence.

Smart Eye Camera

### Implemented clinics:

- Makerere University College
- Mbarara University & Referral Hospital Eye Clinic

## **LET'S COLLABORATE! FEEL FREE TO CONTACT US!**

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare.

So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations.

The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa.

In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need.

That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
