## Introduction of our three new OUI Inc. members!

Three new members joined OUI Inc. in April this year! And we're thrilled to introduce them to you!

**SEC**  
Smart Eye Camera

### Newly Joined Members

- Ms. Koharu Tozawa
- Dr. Rohan Khemlani
- Mr. Hiroki Nishimura

First up, we have Ms. Koharu Tozawa. Originally from Toyohashi, Aichi, Japan, she graduated from faculty of Environment and Information Studies at Keio University, where she also studied the Korean language and studied abroad at Korea University last year. She excelled as an intern at OUI Inc. last year and was captivated by the company's environment where each member can play an active role, leading her to officially join the company as a full-time employee this April. Currently, she is working as a business associate, engaging in various tasks such as domestic sales and conference preparations. Her goals include further proficiency in Korean and acquiring expertise in other languages, with an aspiration to contribute to OUI Inc.'s expansion into Korea.

Second, we have Dr. Rohan Khemlani. He has a diverse international background, having lived in countries like India, Russia, Japan, and Hungary since childhood. Fluent in multiple languages, he graduated from an international school in Sapporo, Japan and obtaining his medical degree at a Hungarian medical university. After graduating, he returned to Japan with a strong desire to contribute to the healthcare industry and joined OUI Inc. from this April. Currently, he is involved in overseas sales activities and writing papers on SEC-related topics. He aims to deepen his knowledge of the medical device industry and further improve his Japanese language skills.

Lastly, we have Mr. Hiroki Nishimura, who is a certified orthoptist who conducted research on the impact of digital devices, such as smartphones, on vision while working as a certified orthoptist in university hospitals/clinics during his graduate studies. With a strong interest in OUI Inc. since his student days, he seized the opportunity to join the company in April this year. Currently, he combines his expertise as a certified orthoptist to engage in sales activities at OUI Inc. Furthermore, he also works as a research associate at Keio University. He is dedicated to promoting the adoption of certified orthoptist in at-home medical care, driven by the low implementation rate of ophthalmic examinations in such settings.

With the addition of these three new members, OUI Inc. will continue to grow and strive towards its goal of reducing global blindness by 50%.

## **LET'S COLLABORATE! FEEL FREE TO CONTACT US!**

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare.

So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations.

The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa.

In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need.

That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
