## OUI Inc. at Japan Cornea Conference 2024

Between February 22 and 25, 2024, OUI Inc. participated in the Asia-Pacific Academy of Ophthalmology (APAO) Congress. This year the APAO was held in Bali, Indonesia. Along with 3 presentations, we also displayed our equipment at the exhibition area.

Our CEO, Dr. Shimizu delivered a presentation titled "Development of Artificial Intelligence to Determine Corneal Diameter Using Anterior Segment Images." Additionally, Mr. Nishimura, an optometrist at our firm, presented a case study on Piggyback Contact Lenses (CL) case for oGVHD cases. Lastly, Mr. Nakayama, our COO, gave a presentation on the international and domestic initiatives of OUI Inc.

We also had a chance to meet many interested ophthalmologists who are now working on projects together with us. The overall response was tremendous! Along with new partners, we also got in touch with our existing partners, which consisted of beautiful moments.

OUI Inc. will continue to work with more countries and accelerate our mission to "Reduce blindness by half and protect people's health through their eyes!"

We look forward to seeing you at the 128th Annual Meeting of the Japanese Ophthalmological Society, to be held at the Tokyo International Forum from April 18 to 21, where the members of OUI Inc. will be presenting as well!

Smart Eye Camera

### Organizations Involved:

- Asia-Pacific Academy of Ophthalmology (APAO) Congress

## **LET'S COLLABORATE! FEEL FREE TO CONTACT US!**

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare.

So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations.

The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa.

In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need.

That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
