OUI Inc.'s Visit to Bhutan!

In February 2024, OUI Inc.'s COO, Mr. Nakayama and hardware engineer Mr. Yokoiwa visited the Kingdom of Bhutan. They engaged in discussions with local professionals to deepen their collaboration. They also exchanged opinions on the manufacturing and utilization of our Smart Eye Camera, produced in Bhutan, for local ophthalmic medical care.

During this visit, discussions were held regarding the Bhutanese production of the Smart Eye Camera. 25 sets were delivered to the Bhutan Ministry of Education with the support of the Asian Development Bank (ADB). Additionally, a lecture and a workshop on how to use our device were conducted for the 25 selected professionals from all over Bhutan. Through this workshop, participants were able to learn the protocols for Hirschberg tests and slit lamp photography using the local Bhutan-produced Smart Eye Camera.

The workshop was prominently featured in the Bhutanese morning newspaper the following day. We visited the Central Hospital to report our activities to the local ophthalmologists, and had a very good discussion regarding future collaboration. Plans are underway to continue the development and spread awareness of our device.

Through this visit, many people in Bhutan were able to directly experience the potential of our Smart Eye Camera. OUI Inc. will continue to deepen collaboration with medical professionals in Bhutan and work towards improving the quality of ophthalmic medical care worldwide through our Smart Eye Camera.

Organizations Involved:

- Bhutan Ministry of Education
- Asian Development Bank (ADB)
- Yangchenphug Higher Secondary School, Thimphu Bhutan

LET'S COLLABORATE! FEEL FREE TO CONTACT US!

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare.

So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations.

The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa.

In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need.

That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
