OUI Inc. Hosts Two American Interns

From June to July 2024, OUI Inc. hosted two interns from the United States - Ms. Breanna Sameit and Ms. Suhitha Reddy. Ms. Breanna Sameit is a pre-medical student at East Carolina University, and Ms. Suhitha Reddy is a medical student at Penn State University's new medical program.

During their short stay, they participated in numerous meetings and successfully established new connections, particularly with North American physicians. Additionally, they attended the Joint Meeting of the 80th Annual Meeting of the Japanese Association of Pediatric Ophthalmology and the 49th Annual Meeting of the Japanese Association of Pediatric Ophthalmology, held in Hamamatsu in June, where they presented our Smart Eye Camera to many healthcare professionals.

On July 23, they delivered their final presentations, showcasing their activities and learnings during the internship. Their presentations were not only impressive but also reflected their enthusiasm and hard work.

Furthermore, during their time in Japan, they had the opportunity to visit many cities, enjoying the culture and cuisine. Despite the short duration, it seems they were able to fully immerse themselves in the experience.

Breanna and Suhitha, we will continue to support you! We hope you will return to Japan someday!

- None

LET'S COLLABORATE! FEEL FREE TO CONTACT US!

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare.

So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations.

The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa.

In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need.

That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
