## Participation in the Eye Camp in West Timor

In October 2024, Mr. Nakayama, COO of OUI Inc., participated in an eye camp held in West Timor, Indonesia. This eye camp is an annual initiative organized by a local NGO, along with OUI Inc.'s Indonesian partners (including Udayana University), and Fawcett Foundation. OUI Inc.'s visit aimed to assess the potential application of the Smart Eye Camera in medically underserved areas in Indonesia.

The four-day eye camp received over 800 applications, and cataract surgery was performed on 150 patients deemed in need of the procedure. For those not eligible for surgery, treatments such as eye drops were prescribed, and referrals for future ophthalmological consultations were provided to ensure proper care tailored to their conditions.

On the first two days, our Smart Eye Camera played a key role in screening applicants to identify those who are indicated cataract surgery. Not only did Udayana University's ophthalmologists use our Smart Eye Camera, but the local NGO staff also quickly adapted to using the device effectively, demonstrating its high usability. Our Smart Eye Camera was also invaluable during the final two days of the camp, assisting in postoperative follow-ups to monitor patients' recovery progress after surgery.

Many of the applicants lived in rural areas, several hours away from the eye camp venue. Local NGOs arranged transportation, ensuring patients' arrival to the venue, often under challenging circumstances. Looking to the future, local partners expressed a strong interest in using our Smart Eye Camera for initial screenings by NGO staff during the application phase. By integrating the AI-powered cataract severity assessment feature currently under development, they expect to be able to pre-screen patients requiring cataract surgery, making operations more efficient and significantly reducing the burden on patients.

One of the most memorable moments during the camp was witnessing a young patient, who had nearly lost their sight due to cataracts, undergo a successful surgery and see their child's face again. This heartwarming moment reaffirmed the significance and potential of overcoming preventable blindness and visual impairments.

This eye camp underscored the transformative impact that proper ophthalmological care can have on improving the quality of life for individuals. OUI Inc. remains committed to supporting communities in West Timor and other regions in need of vision care, contributing to the betterment of lives worldwide.

### Organizations Involved:

- John Fawcett Foundation
- Udayana University

## LET'S COLLABORATE! FEEL FREE TO CONTACT US!

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare. So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations. The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa. In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need. That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
