OUI Inc. Exhibits at annual conference of the Taiwan Society of Home Health Care

On April 26 and 27, 2025, OUI Inc. participated at the exhibition at the annual conference of the Taiwan Society of Home Health Care, held in Chishang Township, Taitung County, Taiwan.

Chishang is a rural area in eastern Taiwan known for its rice farming and sunlight. Many local residents expressed concerns about cataracts, especially considering that the nearest ophthalmologist is often more than an hour away. Therefore, there is a growing interest in portable medical devices such as our Smart Eye Camera.

At our exhibition booth, the Smart Eye Camera, equipped with an AI-powered cataract diagnostic feature, drew considerable attention. Many visitors were surprised by its diagnostic accuracy and ease of use. Some physicians expressed interest in adopting the device on-site, and several nursing organizations signed up for trial use. AI-based ophthalmic diagnostic tools remain rare in the region, which contributed to the high level of interest.

Improving access to medical care remains a major challenge in this region, especially in remote communities. OUI Inc. will continue working to bring ophthalmic care to underserved areas through the power of technology.

LET'S COLLABORATE! FEEL FREE TO CONTACT US!

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare. So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations. The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa. In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need. That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
