## OUI Inc. Showcases Smart Eye Camera at EXPO 2025

From April 29 to May 5, 2025, OUI Inc. participated in the Osaka Healthcare Pavilion at EXPO 2025 Osaka Kansai. Over the course of the week, we introduced our Smart Eye Camera to a wide and diverse audience.

More than 1,500 people visited our booth, including families with children, older adults, students, and guests from overseas. Many were surprised by the compact size and simplicity of the device, asking, "Can something this small really check the eyes?" Their reactions underscored the strong interest in cataract screening and remote eye care.

Throughout the week, we also had meaningful conversations with healthcare professionals. Among them were ophthalmologists, nurses, pharmacists, emergency doctors, and medical students. They were especially interested in the camera's features, including AI-based cataract detection & grading, anterior chamber depth estimation, and possible use in telemedicine. Some visitors even asked to try the device on the spot. These moments often led to deeper discussions and new connections that we hope to build on in the future.

OUI Inc. will keep working to bring eye care to more people. We believe that smart, simple tools can help close the gap in medical access and make a real difference where care is needed most.

## LET'S COLLABORATE! FEEL FREE TO CONTACT US!

Through our Smart Eye Camera, OUI Inc.'s vision is to reduce blindness in the world by 50% by 2025 by delivering appropriate diagnoses to patients who have not been able to receive eyecare. So far, we have conducted various pilot projects in more than 20 countries around the world, including Asia and Africa, in cooperation with local ophthalmologists, NGOs, medical institutions, and international organizations. The internationally recognized CE marking is expected to further increase the recognition and confidence in the Smart Eye Camera, not only in the European market but also in Asia and Africa. In our current corporate stage, the pilot projects are necessary to understand the obstacles of developing countries where our product may flourish to help the maximum number of people in need. That is why we ask for help, offer for future collaboration from all of you, our possible partner, to get the Smart Eye Camera delivered all across the globe to get the proper diagnoses and treatment that all people deserve!
