

ACTIVITIES

ACTIVITIES IN GUJARAT, INDIA

In August-September 2025, we conducted an ophthalmic screening campaign in Mandvi, Gujarat, India, in collaboration with the charity organization DivyaJyoti Trust. This region uses indigenous tribal languages and has limited access to healthcare and education.

We set up a simple ophthalmology clinic using local school classrooms, conducting screenings that included vision and refraction tests, as well as blood pressure and blood glucose measurements. Additionally, teams of young optometrists and students conducted daily examinations while touring the villages. Currently, traveling to hospitals in urban areas requires several hours round trip, making the burden of visiting them extremely high. Due to the strong ultraviolet environment, eye diseases such as pterygium are also common, reaffirming the importance of conducting screenings directly in the community.

NEW MEMBER

INTRODUCING OUR NEW INTERN

Starting in December, Walter Boehme, a medical student from Australia, has joined OUI Inc. as a new intern. Originally from Sweden, he moved to Australia as a child and is currently studying medicine. He aims to specialize in emergency and critical care medicine, working as a physician providing remote healthcare like the Royal Flying Doctor Service, which airlifts patients in remote areas. He decided to join OUI Inc. because he was drawn to the potential applications of the Smart Eye Camera. We look forward to Walter's future contributions!

OUI Inc. will continue working with local partners and members from diverse backgrounds to improve access to ophthalmic care.
